WORKSHOP - FREE OF CHARGE (2H)

Cloud tools compared:
Workshop to prepare your tool evaluation

Introduction

You have an existing analytical application that will soon reach the end of its maintenance period and is still based on on-premise technology and are wondering how you can transfer it architecturally and functionally to a cloud-based future. Do you also wish to map new requirements from AI and self-service?

We explain the differences between the tool sets available on the market in order to prepare a preselection for a detailed tool evaluation. This allows us to optimally map your current and future requirements. We rely on our many years of experience in market-leading cloud systems such as Databricks, Snowflake, Microsoft Fabric and SAP Datasphere.

Content of the workshop

- Brief introduction of biX Consulting
- Review of the current situation
- Comparison of cloud systems
    - Databricks
    - Snowflake
    - Microsoft Fabric
    - SAP Datasphere
- Questions and discussion

Results

The workshop will help you understand the differences between various market-leading cloud systems so that you can prepare a detailed tool evaluation to modernize your existing analytical applications.

00,00€ plus poss. travel expenses according to expense

We would be very pleased if this proposal meets your needs. If this is the case, but you would like to request any adjustments, please feel free to contact us at any time.
We would be happy to design your individual workshop together with you.
