

WORKSHOP - FREE OF CHARGE (2H)

The future of data warehousing

Introduction

You have an existing data warehouse and are considering how you can architecturally transfer this to the future. New requirements from AI and self-service are currently difficult to map. New topics such as Data Mesh or Data Lakehouse mean little to you.

Our workshop „The future of data warehousing“ provides you with the answers you need. In around two hours, we will guide you through current trends and use specific customer examples to show you the architectural scope for design and possible solution scenarios in order to provide a future-proof data platform.

Content of the workshop

- Brief introduction of biX Consulting
- Review of the current situation
- Current trends in data warehousing
 - Data Lakehouse
 - Data Mesh
 - Self-service
 - Artificial Intelligence
- Target architectures
- Questions and discussion

Results

The workshop will help you understand the trends and buzzwords in data warehousing and transfer them to your current system landscape. We will also help you to derive an initial rough target image of a future-proof data platform for your company.

00,00€ plus poss. travel expenses according to expense

We would be very pleased if this proposal meets your needs. If this is the case, but you would like to request any adjustments, please feel free to contact us at any time.
We would be happy to design your individual workshop together with you.
